

Future wealth

The average British child is worth just under £5,000 by the time they reach school

When we talk about the Bank of Mum and Dad, we are effectively talking about handing money over to your children. There are many reasons why your descendants might look to you for financial support, and many routes you could take in funding them, if you so choose.

All children, regardless of means, benefit from learning simple concepts like saving to attain goals and operating within a budget. That can start with pocket money for non-essentials and mature into allowing teenage children to manage their own clothing budget or take control of a portion of the family's charitable donations. You may even want to allow older teens to allocate and manage a small portfolio for exposure to investments.

CHILDREN'S KEY LIFE MOMENTS

A nationwide survey^[1] of parents has revealed the wealth that average British children have accumulated by the time they reach adulthood, with the average UK child having amassed just under £5,000 by the time they reach school at the age of five, just over £10,000 by the age of 18 and £12,000 by the time of their 21st birthday.

The majority of UK parents surveyed said they began saving for their children's key life moments when they were five years old, with 27% saying they started before their child reached their first birthday and 15% even admitting they began before their child was even conceived!

MAKING THEIR OWN MONEY

The findings revealed that £125 a month was the average amount that parents put aside for their child's future each month. 39% of those who responded said they feel it is the duty of every parent to save for their children, whilst 55% believe it is their duty but admit they can struggle with the obligation.

One in 20 (6%) insist their children should make their own money and their own way in life, without assistance from their parents.

BEST POSSIBLE START IN LIFE

Everyone wants to do right by their child but we appreciate it's not always easy. Instead of large

presents on birthdays or at Christmas, consider using part of the budget to save for their future.

The majority of parents want to give their child the best possible start in life, but what are the best ways to invest for children? Some ways of passing money on to your children can start very early, including putting money into a Junior Individual Savings Account (JISA) for your child.

HELPING THE YOUNGER GENERATION

The current annual allowance for contributions is £9,000 (tax year 2022/23), meaning that if you start paying into a JISA when your child is young, they could find themselves with a sizeable sum of money by the age of 18.

Focusing on later life stages, some parents might also consider contributing to their children's pension pots. Covering school fees and other expenses for grandchildren is another possible way to help out younger generations financially. But with house prices at historically high levels, the most common 'Bank of Mum and Dad' queries we receive concern helping the younger generation onto the property ladder. ■

BUILDING UP A SAVINGS POT

Putting money aside for a child is a great way to prepare them for their future, and can also teach valuable lessons about their managing their finances. To discuss how we could help you make their savings work harder, please contact us for more information.

THE VALUE OF INVESTMENTS CAN FALL AS WELL AS RISE AND YOU COULD GET BACK LESS THAN YOU INVEST. IF YOU'RE NOT SURE ABOUT INVESTING, SEEK PROFESSIONAL ADVICE.
